Indications:

As an aid in treatment of infections caused by or associated with micro-organisms sensitive to oxytetracycline HCl.

Calves

For bacterial scours and bacterial pneumonia.

Swine

For bacterial enteritis and bacterial pneumonia.

Poultry

For the treatment and prevention of synovitis and bacterial enteritis.

Dosage:

Calves and Swine
(individual treatment)

5 g per 1000 kg body weight dissolved in water, twice daily for 2 or 3 days.
For mass medication, 10 g per 900 kg of body weight to be provided in drinking water consumed daily.

Poultry

100 g per 1350 L of drinking water for 3 or 4 days.

NOTE

Only medicated drinking water should be provided during the treatment period and fresh solutions should be prepared daily.

WARNING

Treated animals must not be slaughtered for use in food for at least 10 days for calves and swine and for at least 7 days for poultry, after the latest treatment with this drug.
Do not use in lactating dairy cattle. Do not use in laying birds.

STORAGE

Protect from light and humidity. 15°C to 30°C
