Statement of Intent: Bio Agri Mix (BAM) blends, packages and sells soluble powders for the treatment of livestock diseases containing Tetracycline. Tetracycline is also found as a related substance in other Tetracycline family antibiotics marketed by BAM. BAM intends to minimize losses of Tetracycline from its processes and properly dispose of any waste to minimize releases from our facility.

BAM does not ferment the active substances and there is an established animal health requirement for these substances therefore this plan does not address creation or feedstock substitution.

Objective: This plan will determine the technical and economic feasibility of options to minimize losses of Tetracycline to the environment from our facilities.

Target: BAM plans to ensure Tetracycline losses from our processes are minimal.
